Summary

Highly motivated and technically proficient recent graduate who possesses a strong foundation in networking principles, systems administration, and information security. Skilled in configuring, troubleshooting, and optimizing network infrastructure using Cisco products. Demonstrated ability to work collaboratively in team environments and adapt to evolving technological landscapes. Passionate about leveraging technology to enhance operational efficiency and ensure secure data management. Seeking a position to apply theoretical knowledge, gain practical experience, and contribute to the success of an organization's IT initiatives.

Experience

Network Engineer
US Bank

Jan 2023 - May 2023 (5 months)

Capstone Project: Network Automation with CI/CD

Team of 7 tasked with ensuring a desired configuration for an environment by leveraging a code repo and an infrastructure as code approach. The requirements for the project were as follows:

- Leverage a code repo to store a baseline configuration for each (GitLab)
- Demonstrate the deployment of a baseline configuration for each component
- Demonstrate a new configuration for each of the components
- Demonstrate the ability to show an audit of compliance for each of the assets
- Demonstrate 'config drift of a device' and the recognition of this through network automation and a consumable format
- Demonstrate the automated action to bring the device back to conformance
- Demonstrate a code upgrade (ensuring the device is ready for a deployment, automated and timed deployment, automated verification that it works after upgrade)

My role for this project was writing base configuration for the Cisco router, creating the code for testing conformance using pyATS, and checking for config drift and compliance using NAPALM

Head of Facility Management
St. Paul's Lutheran Church

Aug 2022 - Present

- Assigned job tasks to guarantee timely and efficient job completion
- Worked cohesively with team members to complete job tasks
- Communicated with school management to ensure jobs were done on their time schedule and to their satisfaction
- Ensured a safe and clean environment for students to learn in

Quality Assurance Intern

Renaissance Learning

Jun 2018 - Sep 2019 (1 year 4 months)

• Audited hardware inventory

• Troubleshooted and resolved technical issues with employee hardware

• Assisted with tickets in help desk when necessary

• Demonstrated effective communication and critical thinking with other help desk members to proactively solve issues

• Kept virtual machines maintained in VMware

Education

University of Wisconsin-Stout

Bachelors of Science in Computer Networking and Information Technology

Minor in Information Security Management   Major GPA: 3.43

Skills

Critical Thinking • Border Gateway Protocol (BGP) • Open Shortest Path First (OSPF) • Ansible • Continuous Integration and Continuous Delivery (CI/CD) • Cisco LAN/WAN Design and Implementation • Configuration Management • Cisco Device Troubleshooting • SD-WAN Design • VMware • VOIP Phones • Palo Alto Firewall • AWS • Exceptional Communication • Linux • VPN • Network Administration • Active Directory

Certifications

AWS Certified Cloud Practitioner

Testout PC Pro

Testout Network Pro

Testout Linux Pro
